

## Discover invisible induction with Induc-Stone

Our French partner ADVENTYS have developed Induc-Stone, a technology that allows chafing dishes to be kept warm with induction units placed under stone benches with single degree temperature precision.

Induc-Stone can be installed under granite, concrete, marble or quartz, and thanks to its silicone spacer, the stone surface temperature never exceeds 550C. No need for any cut-outs! The controls are simple to use and can be locked to avoid customers accidentally changing or bumping the controls.

Adventys is a French manufacturer specialising in Induction Technology. They control the whole production process from component to finished product. We have installed more than a hundred Induc'Stone systems in Australia and have several references from very satisfied customers.

# PHOENIKS

Induc-Stone is compatible with a wide range of surfaces

## Key Features

- Latest patented technology.
- ALWAYS have hot food even if the dish is not absolutely in the centre of the hob.
- Adventys spacers are made from flexible silicon and can be cut to the size of the chafing dish or used long for a rectangular GN size chafing dish.
- Inexpensive and flexible.
- Cheap installation as Adventys specification is 20mm stone maximum.
- No minimum spacing between units, so more can be installed in a given space.
- More flexibility for the customer regarding the chafing dishes. You can buy ours or use what you already have.
- Multi-purpose use of bench due to silicone spacer being removable.
- Heat from induction unit is centralised to chaffing dish and area directly under.
- Adventys products are 100% made in France and have strict quality control/testing procedures in place

## Technical Specifications

Cooking surface:

Stone, quartz, ceramic, concrete....

Thickness of bench:

Between 4 and 20 mm

Functions:

On/Off, manual setting (+/-) with 2 digits display and timer control. Levels: from 1 to 20.

Dimensions:

Depth: 340mm, Length: 340mm, Height: 169mm

Power supply:

650W - 240V - 1phase - 3A

As with all PHOENIKS products, Induc-Stone is covered by a 2-year warranty.

\*Composite material: please check before each project with your stone manufacturer that the composite is NON FERRITIC
