

BRUNNER INDUSTRIAL PRE-ROTATING GRINDER FOR CHEESE, NUTS, CHOCOLATE.

Product Advantages

- Intelligent processing system for production lines in multi-shift operation
- In the pre-rotation system, the centrifugal force brings the raw material to the grating disc without pressure, where rotating vanes then discharge the grated product
- Pressure-free, gentle grinding without squeezing, heating or loss of natural oils
- Low production costs thanks to durable, handground grating discs
- Processing of a wide range of foodstuffs thanks to various insert
- Production volume of up to 2 tons per hour.

Technical Data:

Model No.	261.02401
Dimensions	817 x 482 x 1435 mm 415 3
Voltage	phase AC 50 Hz
Motor	4.0 – 7.5 kW
Output	approx. 2000 kg/hour
Speed	380/750 rpm
Weight	155 kg
System of protection	IP 56
Material	Stainless steel
Conforms to	CE, UL
