

KÜCHENMEISTER

The Art of Great Kitchens

Master of Performance

High Tech and Quality Handcrafted

Made to measure and individually crafted by skilled craftsmen. Innovative, advanced technology, high quality materials, an exemplary quality management and highly qualified specialised personnel all guarantee that every MKN KÜCHENMEISTER is individually certified as a “masterpiece”.

Whether equipped with electrical or gas appliances or with modern original MKN induction technology: In its specific configuration, the KÜCHENMEISTER always embodies the ideal adaptation of the personal requests and requirements of the customer.

Over 360 electrical and gas appliance variations can be virtually freely combined in the MKN KÜCHENMEISTER. They allow not only for the largest possible scope of planning but also for the definition of optimal and therefore ergonomic and cost effective work processes.

Attention to detail in quality and hygiene

Angular panel design

Highly functional handling

Custom-Built for Professional Chefs

- A "HansDampf Junior" combisteamer can be integrated or mounted.
- For one or more workplaces, with or without shelf.

Unlimited Variety – Intelligently Combined

Design panel with
individually selected
choice of colour and
“personalised” with
your own logo.

- Individual construction and design to meet the customer's requests according to its intended use
- Continuous, seamlessly welded hygienic surface top made of high quality, solid stainless steel

- Single or two lines, at a right angle or as a compact, rounded version with freely selectable dimensions
- Substructure open, closed or on supports

Perfect Interaction

Free Selection and Combination
of all MKN Innovations

INDUCTION

The new generation of original MKN high performance surface induction with various sizes and connection values: faster energy transmission, high efficiency and easy to clean.

VAPRO

Boiling kettles with MKN VAPRO, with separate steam generator for quick boiling kettles: very short cooking times, low energy requirement as well as low maintenance requirement.

POWER[®] BLOCK

Griddle plate with MKN POWERBLOCK, i.e. short heating-up times, even heat distribution, fast energy transmission with very high efficiency.

INNOVATION

Electrical deep fat fryers are welded seamlessly at a raised level into the hygienic surface top. You can choose from either a thermostatic or an electronic temperature control.
